

Aldo Cibic for Selva: Pont Table is born

Verona, June 2019 - 2019 is a very important year for **Selva**, full of big news, as the partnership with important international designers. In this scenario, the **Pont** table is born, **designed by Aldo Cibic**; an iconic piece of furniture expressing a **structural and poetical idea of design using solid wood**.

"Its profile is like a bridge and actually, from the symbolic point of view, I like it very much"; that's why the table has this name.

Made of ash wood, it consists of two parts: the plane is large, geometric and slim and the curved legs, smooth and oval enlarging reaching the intersection.

A big table (cm L 270 - D 115 - H 73) with a **structural lightness out of the ordinary**. A traditional piece of furniture with a well defined, versatile and strongly impressed contemporary personality: **the Pont table sets perfectly in the Selva living philosophy**, with an incredible mix and match of styles, materials and colours.

With its **Ash Dark, Ash Tobacco and Ash White finishings**, the **Pont** table places itself as a *must have* for all design dining spaces all over the world.
